## Profile Summary

I am an 18-year-old frontend developer with a passion for building clean, responsive websites. I am currently learning software engineering and gaining experience through personal projects. My goal is to become a full-stack developer and support myself independently.

## Skills

- HTML, CSS, JavaScript
- Responsive Web Design
- Flexbox & CSS Grid
- Git & GitHub
- Basic PHP
- Beginner-level app development

## Projects

### BigFood Website

A responsive food ordering website featuring a left-side menu, fixed header, and styled alert messages.

### Personal Portfolio Website

A portfolio showcasing my frontend projects with smooth navigation and a modern responsive layout.

### Driving Age Checker App

A JavaScript app that checks if a user is old enough to drive based on their input.

### Animated Form Design

Designed a creative form with animated borders using ::before pseudo-elements and CSS effects.

## Certificates

- Frontend Development Certificate - W3Schools
- Web Developer Practice Projects - Frontend Mentor

## **Experience**

Freelance Frontend Developer (Online Platforms)

Worked on various frontend challenges and real-world project simulations through platforms like W3Schools and Frontend Mentor to improve and demonstrate development skills.
