Bigboy Chukwuemeka

Junior Frontend / Software Developer
Email: bigteslaboy@gmail.com | GitHub: github.com/bigteslaboy3-creator

Profile

I am a motivated junior developer with hands-on experience building responsive websites and small applications. I enjoy learning by doing, solving real problems, and improving my skills through practical projects. My focus is on clean design, usability, and writing code that is easy to understand and maintain.

Skills

HTML, CSS, JavaScript, PHP, Responsive Web Design, Git & GitHub, Basic Python, UI Styling, Problem Solving

Projects

Calculator Web App
Built a functional calculator application that handles basic financial calculations such as loan estimates and fees. Focused on clarity, speed, and ease of use.

Portfolio & Business Websites
Designed and customized responsive websites using HTML, CSS, and JavaScript. Worked with templates and custom layouts to meet client needs.

Experience

Junior Web Developer (Freelance)
• Built and styled web pages for small projects and personal clients.
• Improved existing designs for better responsiveness on mobile devices.
• Added simple backend features using PHP.

Education

Secondary School Student (SS3 Level)
Actively learning software development through online courses, practice projects, and self-study.

Additional Information

Strong interest in software engineering, continuous learning, and technology-driven problem solving. Comfortable working independently or as part of a small team.
